

FSQ Experts make technology safer for human beings!

Why does FSQ Experts exist?

1. We really care for safety of the human beings.
2. We contribute to make technology and products much safer.
3. We empower companies, their decision makers and engineers by coaching, consulting, training and expert level engineering.
4. We create systematically a company-wide safety and quality culture in hearts and minds.

Our customers are developers of high-end safety critical products in the automotive industry. They want to place safe and high-quality products on the market on time and within budget. We support them by raising the quality of development- and management processes and by enhancing the know-how of project teams towards a level of sustainable ISO 26262:2018 and ASPICE compliance.

We place very high demands upon ourselves with regard to technical competence and customer satisfaction.

To expand our team of experts we are looking for an

Automotive Functional Safety Expert

Join our FSQ Experts team, if ...

- You want to enrich your outstanding experience as an automotive functional safety expert.
- It gives you professional satisfaction to empower customer teams through specialist coaching so that they can develop and get approved safety critical products (on System- / HW- / SW-level).
- You are keen to actively support the development of ADAS and Automated Driving solutions with consultancy and engineering.
- You are interested in deepening and applying your technical and process expertise in the field of functional safety at the interfaces to security and related systems engineering topics, such as SOTIF or ASPICE.

You are most welcome in our FSQ team, if ...

- ✔ You have an excellent or at least good university degree in Electrical Engineering, Physics or a related field.
- ✔ You have in-depth experience in software or hardware development of embedded systems.
- ✔ You possibly have been successful in the field of ADAS and Automated Driving solutions and have been involved in the design or implementation of embedded systems.
- ✔ You have not only a technical understanding about the product, but you also are able to help enforcing -- with all social skills required -- the implementation of standards such as ISO 26262, ISO PAS 21448 (SOTIF) or ASPICE.
- ✔ You see your challenges for safety not in an ideal, but in the real world. In other words, you focus on how the safety compliance requirements for automotive systems can be fulfilled in a highly effective and efficient manner.
- ✔ You are motivated to train other FSQ team members on-the-job to become functional safety experts.
- ✔ You enjoy traveling from time to time and being involved in customer projects in Germany, Europe and world-wide.

With FSQ as your new workplace in Munich you can expect ...

- a respectful way of dealing with each other.
- an open appreciative way of communicating.
- a bright, agile and modern company.
- flexible working hours and the possibility of home office.
- a permanent contract.
- cutting edge projects in automated driving.

When do we meet?

We look forward to hearing from you at contact@fsq-experts.com or [+49 \(0\) 89 588 087 573](tel:+49089588087573), so that we can arrange a personal meeting. Feel free to let us know about your earliest starting date and your salary expectations.
