

## FSQ Experts make innovative technology safe!

### The mission of FSQ Experts

Our customers are developers of high-end medical devices. They want to place safe and high-quality products on the market on time and within budget. We support them by raising the quality of development- and management processes and by enhancing the know-how of project teams towards a level of sustainable product safety compliance. We place very high demands upon ourselves with regard to technical competence and customer satisfaction.

To expand our team of experts we are looking for a

## Technical Senior Consultant (Medical Devices)

### How can you contribute to the FSQ Experts team?

You want to enrich your outstanding experience as technical senior consultant in the field of medical devices. Developing customer solutions in exciting consulting and engineering projects would give you professional satisfaction. You are interested in deepening your consultancy expertise by supporting companies developing innovative medical devices within rigorous regulatory frameworks. You enjoy performing in an agile and international working environment where both German and English are spoken.

### In your daily work, you

- actively support the development of innovative and complex medical devices with consultancy and engineering through the whole product life cycle, from conception to market entry, and technical audits.
- use your strong knowledge of product development, both in V-Model and agile frameworks, to enable the customer to follow standards across the EC 60601-x series, as well as IEC 62304.
- contribute to the implementation of general safety and performance requirements according to MDR and trigger and drive a risk-based mindset within the whole development project.
- support the development of technical documentation, using the customer pre-defined tools, with the focus on requirements management, verification and validation, and reliability engineering.
- apply your technical and your soft skills to empower our customers to develop and bring to market medical devices (on System- / HW- / SW-level). Be ready to act as a technical consultant, process developer, moderator or coach on a case-by-case basis

## You in our Team

- ✔ hold an excellent degree in medical devices or software engineering or another relevant field.
- ✔ have at least 3 years of experience in a technical consulting role and at least 5 years of experience within technical development of medical device products
- ✔ are familiar with work environments compliant with a quality management system acc. to ISO 13485 and ISO 9000.
- ✔ have a good pre-knowledge on regulatory requirements (focus MDR and FDA compliance, other jurisdictions is a plus)
- ✔ have excellent project and time management skills, are self-organized and self-motivated with a positive mindset.
- ✔ have ability to work as well independently as in a team set up in technical consulting projects.
- ✔ are communicative and service oriented, willing to support and empower a wide variety of clients.
- ✔ are pragmatic, enjoy a mix of activities in technical engineering, business processes, quality assurance, and coaching.
- ✔ are curious and willing to contribute to the expansion of FSQ's knowledge base in fields such as cybersecurity and artificial intelligence.
- ✔ enjoy traveling from time to time and being involved in customer projects in Germany, Europe, and world-wide.
- ✔ you are fluent in German and English (both C1 level or higher)

## FSQ as your new workplace

You would like to work with us in Munich. You expect

- ✔ a respectful way of dealing with each other.
- ✔ an open appreciative way of communicating.
- ✔ a bright, agile and modern company.
- ✔ flexible working hours and the possibility of home office.
- ✔ a permanent contract.
- ✔ cutting edge projects in the medical device industry.
